Summary:

As an software engineer, my goal is to contribute my technical expertise and problem-solving. I am passionate about creating efficient and scalable software solutions, and I thrive in dynamic and collaborative environments. I am eager to tackle complex challenges, stay up-to-date with emerging technologies, and continue my professional growth while delivering high-quality software products that make a positive impact

Skills:

- Html, Css, Javascript
- Bootstrap
- Python
- React, Redux, Router Dom.
- Nodejs, ExpressJs, JWT, Cors, Api Rest
- Mongo DB
- MySql

Languages:

- English
- Spanish

Education:

Instituto tecnológico de Durango - 2018-2023

– Mechatronics engineering

[Durango, Dgo, Mexico.](#)

Projects:

1. TuFrontend (Project Name): (Nov 2022- Present)

Description: Developed a platform offering free web components and CSS generators. Built using **React**, **Node.js**, **MongoDB**, and **JWT** for user authentication and password hashing. Employed **react-router-dom** for efficient routing.

2. IoT Page (Tentative Name): (Feb 2023 - In Progress)

Description: Currently building a platform for IoT device connection and management. Utilizing similar technologies to those mentioned earlier, including **React**, **Node.js**, **MongoDB**, and **JWT** for authentication. Also using **react-router-dom** for navigation.

3. English Learning Page (Tentative Name): (jun 2023 – In Progress)

Description: Developed a comprehensive platform offering English language learning resources, including a blog, educational games, vocabulary tools, and more. Created using **React**, **Node.js**, **MongoDB**, and **JWT** for authentication. Utilized **react-router-dom** for content organization and navigation.
